

Art Unit: 1792

1. Claims 1-3 remain in the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yoshida (5,206,216).

Yoshida (5,206,216) teaches a method for fabricating oxide superconducting wires by laser ablation whereby a tape base material is coated with an oxide superconducting film by laser beam contacting a target while the tape is translated (abstract and Figs 1-3). The speed of the translated tape is between 5cm/min and 50cm/min (3-30 m/hr) (col. 2, lines 60-65 and example 3). The target is spaced from the tape by 30 mm (example 2). Figure 1 depicts a single target and laser. The superconducting material is a barium copper based superconductor YBCO (col. 2, lines 20-25). The laser is a pulsed laser (col. 3, lines 62-68).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian K. Talbot whose telephone number is (571) 272-1428. The examiner can normally be reached on Monday-Friday 8AM-4PM.

Art Unit: 1792

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy H. Meeks can be reached on (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
